

glycosade®

Description

A food for special medical purposes.

Glycosade® is a hydrothermally processed high amylopectin starch.

Indications

Glycosade is for use in the dietary management of glycogen storage disease (GSD) where the use of a long acting starch is indicated, from 2 years of age.

Dosage and Administration

To be determined by the clinician or dietitian following appropriate assessment (a fasting Glycosade load is recommended), and is dependent on the age, body weight and metabolic response of each patient.

Each 60g sachet of Glycosade has an equivalent carbohydrate content to approximately 55g of uncooked cornstarch.

Preparation Guidelines

To be determined by the clinician or dietitian. Glycosade can be either taken as a drink or added to food.

Glycosade som drik :

Hæld den påskrevne mængde Glycosade i den medfølgende shaker

Tilsæt væske efter eget valg. Et brev Glycosade er normalt passende til 100 ml kold vand, mælk eller andre tilladte væsker

Sæt låget godt fast Ryst godt i 10 sek

Nyd din Glycosade umiddelbart efter tilberedning

Glycosade taken with food:

Add the required amount of Glycosade to 150-200ml of suitable yoghurt or cold custard/rice pudding.

Stir well until smooth with a fork or a small whisk.

Eat Glycosade straight away.

Glycosade may also be given through a feeding tube.

Close the lid tightly and shake well for 10 seconds.

Do not heat or warm Glycosade as this destroys the properties of the starch.

IMPORTANT NOTICE

Must only be given to patients with proven GSD under strict medical supervision.

Suitable from 2 years of age.

Not for use as a sole source of nutrition.

For enteral use only.

Storage

Store in a cool dry place.

Ideally sachets should be used immediately after opening.

Any unused powder in an open sachet should be kept in an airtight container or sealed with a clipper and used within 24 hours.

Pack size/Weight

30 x 60g sachets = 1.8kg

Flavours

Unflavoured.
