# mddJelly

STERILE

Protective shield  
for instruments  
and body tissue

## MDD JELLY STERILE

MDD JELLY STERILE is used to lubricate natural cavity of human body and form protective shield on the surface of instruments to avoid the oxygen or other materials which might rust the instruments. It can abate the friction when medical devices insert into human body as well as to help relieve patient's pain.

## Features

- Good solubility of water, irradiation sterilization, transparent, without any chemical residues, safe, non-toxic and nonirritating
- Meet human cavity PH value which is subacidity
- Suitable for different clinical examinations and operations
- Mild, refreshing, greaseless
- Safe to body tissue, will not cause damage to rubber and metal appliances
